

Automated Conformal Coating Inspection Presentation and Workshop

Dates: 3rd March 2009 in Cambridge & 5th March 2009 in Bristol

As part of the Goepel Electronics Technology Days looking at Boundary scan and AOI, SCH Technologies will be offering a presentation, demonstrations and practical advice on conformal coating inspection and the ability to automate the process.

On display will be the ACCIS Automated Conformal Coating Inspection System which is designed for the automatic inspection of the quality of a conformally coated circuit board. It highlights the areas where the board is coated & not coated, as well as highlighting areas suffering from common defects such as de-wetting, cracks and delamination.

The ACCIS provides a reliable and versatile quality control solution for Automated Conformal Coating Inspection.

SCH Technologies is a Trading Name of SCH Services Limited
Unit B, 4 Wharnccliffe Street, Barnsley, South Yorkshire. S70 6BP
Tel: +44 (0)1226 297711 Fax: +44 (0)1226 297733
