

Conformal coating consultancy

SCH Technologies is a Consultant Member of the unique Nexus3C Conformal Coating Consultancy.

This allows customers of SCH to receive unparalleled service, knowledge and analysis to address the many issues and problems which occur regularly in the world of electronics manufacturing related to coating, cleanliness and long term reliability. The consultation services SCH can offer help with troubleshooting, new product introduction (NPI), bench marking and support contracts.

Have a conformal coating expert ready to help you!

When problems occur in conformal coating they can be highly costly.

With an SCH Support Package in place you can get independent advice on what the issues are and more importantly why they are occurring in ALL AREAS OF THE PROCESS regardless of whose material, equipment or process is in operation.

Need help in bringing in a new conformal coating new process?

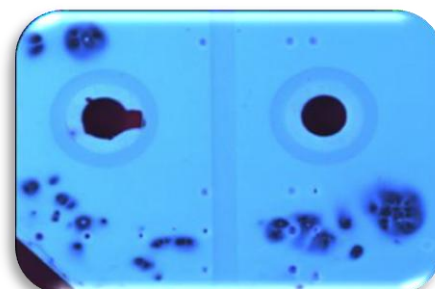

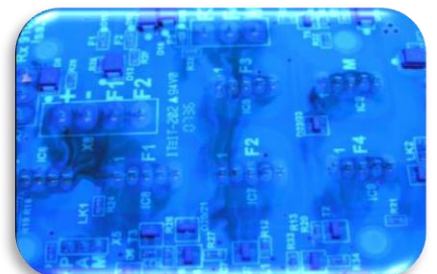

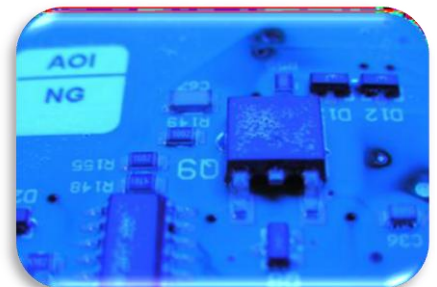

New Product Introduction (NPI) is challenging. Bringing in a new material or system can be more cost effective and you can minimise risk by working with independent consultants who can offer their advice on what to choose.

Bench marking: How do you compare to the rest of the world?

A complete review of the conformal coating processes including related areas such as cleaning, manufacture etc to give an in depth report on the current healthiness of the process. We can help you improve your processes, efficiency and save you money.

What happens when a problem occurs in your coating process?

When problems occur it is normally quicker and lower cost to ask an expert what the problem is and fix it. Our troubleshooting experts have solutions for the majority of conformal coating issues and long down times and costly analysis can be significantly reduced.
