

## Conformal coating new product introduction (NPI)

*Need help choosing the right conformal coating process, equipment or material?*

Consultants at SCH have been working in the field of conformal coating for greater than twenty years and can offer invaluable advice, practical experience and knowledge to assist in the selection of a conformal coating process, conformal coating material or item of conformal coating equipment.

New conformal coating processes, materials and equipment are being developed every day. The speed with which technology changes makes it almost impossible for the average engineer to know everything about conformal coating and that is where SCH can help.

Our consultants have intimate knowledge of the available conformal coatings and equipment in the market place and work with suppliers on a regular basis to ensure their knowledge is up to date. They are also aware of the current standards, legislation, and best practices and have in-depth experience in recommending processes that work immediately and without compromise.

This allows SCH to recommend the optimum practical and commercially suitable process for the customer, without compromise to results.

SCH Technologies is a consultant member of the unique Nexus3C conformal coating consultancy.

This allows customers of SCH to receive unparalleled service, knowledge and analysis to address the many issues and problems which occur regularly in the world of electronics manufacturing related to coating, cleanliness and long term reliability. The consultation services SCH can offer help with troubleshooting, new product introduction (NPI), bench marking and support contracts.

Contact us directly so that we can help you now.
