

Parylene coating device

"Built to your specifications"

Standard features:

- Manually operated - vertical chamber
- 12 ft x 8 ft recommended floor space
- Engineered to fit your application
- "Swappable" chambers for enhanced throughput.
- Cleanroom design for medical applications
- Tangential monomer entry/exit
- Quartz-lined Pyrolyzer (>750 °C)
- Vaporizer temp range to 200 °C
- Electro-pneumatic valves
- TC gauge for vacuum readout
- Programmable temperature - thermocoupler
