

CONFORMAL COATING CONSULTANCY

Conformal coating solutions made easy

See how we can help you improve your conformal coating process in so many ways

Our unique experience and expertise in conformal coating allows us to help you get the maximum out of your process. We can support you in the many issues and problems that occur regularly in the world of electronics manufacturing related to conformal coating, cleanliness and long-term reliability.

Our consultation services includes help with:

Troubleshooting. *What happens when a problem occurs in your coating process?*

When problems occur it is normally quicker and lower cost to ask an expert what the problem is and fix it.

Our troubleshooting experts have solutions for the majority of conformal coating and Parylene issues and long down times and costly analysis can be significantly reduced.

Bench Marking. *How does your process you compare to the rest of the world?*

A complete review of your conformal coating processes including related areas such as cleaning and circuit board manufacture can help you improve your processes, efficiency and save you money.

New Product Introduction (NPI). *Need help in bringing in a new conformal coating process?*

Introducing a new material or coating system can be more cost effective and you can minimise risk by working with independent consultants who can offer their advice on what to choose.

Process Development. *Need to fine-tune your conformal coating line to get the optimum results?*

We can show you how to get the best ROI for your required conformal coating process whether its solving a current problem, improving the process or introducing a new product to the line.
