

Technical Overview

CONFORMAL COATING DOUBLE INSPECTION BOOTH

Model No. IB101

Conformal coating solutions made easy

Want to improve your conformal coating inspection process? Use an inspection booth

The **IB101 double inspection booth** is designed specifically for practical conformal coating inspection and finishing of printed circuit boards (PCBs) for one or two operators.

The inspection booth is an ergonomically designed system that optimises the UV light intensity and darkness for the best inspection performance for the operator while protecting them from any solvents used.

Standard Features

- Two x Twin UVA lighting tubes fitted in the ceiling enclosure that are cleverly shielded from the operators eyes to create the best inspection environment
- Double spigot inlet for connection to suitable extraction to protect operators from fume build up
- Two ESD Points for left and right-handed operator use with an earth point at the rear to insure circuit board safety
- Externally powder coated framework to give lasting cosmetic finish

When it comes to inspecting the quality of your coating process there really is no solution like the IB101 inspection booth.

Facilities

- 150mm extraction connection
- 13A Single phase electricity supply
- 1080 cfm extraction required (0.7m/s face velocity requirements)
