

CONFORMAL COATING BENCHMARKING

Technical Overview

Conformal coating solutions made easy

Would you like to know how good your conformal coating process really is?

A Benchmark Review of your conformal coating processes and other related applications including assembly and cleaning from an outside expert will almost certainly lead to an improvement and offer savings in time, efficiency and money.

Engineers today are so busy it is difficult to keep up with the specialist niche knowledge required relating to conformal coating, cleanliness and reliability.

To solve this issue it is generally easier to use an outside expert that can tell you how well your processes compare to the cutting edge companies and techniques in operation today.

Benchmark Assessment

A benchmark assessment would involve the complete analysis of a customer's current production process including but not exclusive to conformal coating. Examining the whole line ensures that all up and downstream influences on the coating process are considered.

The assessment would then be compared against current industry standards and best practice. This will then provide valuable insight on how general and specific improvements can be made within the facility and also help to avoid potential long-term reliability problems.

Contact us now

Find out how well your conformal coating process really performs and how we can help you improve your results.

SCH Coating Solutions Pvt. Ltd.
 11-1-128, Sitaphalmandi, Secunderabad
